Figure 1: Judulnya adalah

```
#include <stdio.h>
class ClArray {
        private:
        float data[100];
        int Size;
        int Length;
        public:
        ClArray()
        {
                Size = 100;
                Length = 0;
```

```cpp
        }
        void Append(float Vi)
        {
                if (Length<Size)
                {
                        Length++;
                        data[Length-1]=Vi;
                }

        }
        void Display()
        {
                int   i;
                for (i=0;i<Length;i++)
                {
                        printf("%f\n",data[i]);
                }

        }

};

int main()
{
        class ClArray d;
        d.Append(1);
        d.Display();
        return 0;
}
```
